DETAILED ACTION

1. Claims 1 – 14 are pending in this application.

Claim Objections

2. Claims 1, 6, and 7 are objected to for lack of an antecedent basis.

(a) Claim 1 recites the limitation "the newsletter content."

(b) Claims 6 and 7 recite the limitation "the content provider."

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. **Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Tucciarone et al (Pre-Grant Publication No US 2004/0122730 A1) hereinafter Tucci.**

5. With respect to claim 1, Tucci discloses a method for a newsletter subscription system of a multimedia messaging service ([0005], lines 1-10) comprising: viewing a list of available electronic newsletters in a subscription portal, by a subscriber ([0007], lines 2-7; [0016], lines 1-5; [0024], lines 3-10); selecting to subscribe to at least one of the

Art Unit: 2151

available electronic newsletters, by the subscriber; ([0014], lines 1-8 and [0102] lines 1-10, the latter reference describes advertisements from different websites and etc.) obtaining content of the subscribed electronic newsletters and a list of subscribers according to delivery time, by a push portal ([0013], lines 1-8); sending the newsletter content according to the list of subscribers by the push portal, to a multimedia messaging service center via a common service platform ([0014] lines 5-7, the clearinghouse is the messaging service center); and sending the newsletter content to each subscriber's mobile phone, by the multimedia messaging service center (Table A, page 17, Section 13A, Line 4).

6. As for claim 2, Tucci discloses before the subscriber can use wireless application protocol (WAP) ([0142] lines 1-3) via a mobile phone to enter the subscription portal and proceed with subscribing, the subscriber has to login through an authorization server ([0083] lines 1-3).

7. As for claim 3, Tucci discloses before the subscriber can use the world wide web via a computer to enter the subscription portal and proceed with subscribing, the subscriber has to login through an authorization server ([0083] lines 1-3).

8. As for claim 4, Tucci discloses when the subscriber subscribes to the electronic newsletters in the subscription portal, the subscription portal switches operation to a newsletter content provider according to a selected type of

Art Unit: 2151

newsletter ([0014], lines 1-8, web portals are designed to provide access to a website. Likewise, the providers provide their web portals to the clearinghouse for subscriber access).

9. As for claim 5, Tucci discloses the subscriber can choose the delivery time when subscribing to the electronic newsletters ([0013], lines 1-8).

10. As for claim 6, Tucci discloses after the subscriber completes the subscription, the content provider sends subscription data according to a selected type of newsletter, to the common service platform to be used as subscriber login data; and whereby, after logging in, the subscription portal requests the common service platform to send the subscription data and displays the data on the subscription portal ([0022], lines 7-13).

11. As for claim 7, Tucci discloses the subscriber can use unstructured supplementary service data protocol (USSD) via a mobile phone to enter the subscription portal and proceed with subscribing (USSD is a standard protocol, likewise, Table A, page 17, Section 13A, Line 4 discusses using a mobile phone); whereby, the subscription portal displays a code for newsletters, in order for the subscriber to select (a code or word is an obvious use for representation of items on a website); and whereby, after completing subscription operation, the subscription portal sends the subscription data according to selected newsletter type to the content

provider unit of the chosen newsletter ([0014], lines 1-8, web portals are designed to provide access to a website. Likewise, the providers provide their web portals to the clearinghouse for subscriber access).

12. As for claim 8, Tucci discloses the push portal can also control newsletter transmission, and the push portal can only have one setting at a time as a transmission channel to transmit electronic newsletter content and each transmission channel can only send to one subscriber flow ([0013], lines 1-8).

13. As for claim 9, Tucci discloses when the common service platform receives the content of the electronic newsletters from the push portal, the common service platform sends a reply to the push portal ([0022], lines 7-13 and [0088], lines 1-4).

14. As for claim 10, Tucci discloses when the multimedia messaging service center receives the content of the electronic newsletters from the common service platform, the multimedia messaging service center sends a reply to the common service platform ([0022], lines 7-13 and [0088], lines 1-4).

15. As for claim 11, Tucci discloses whereby the content of the electronic newsletters in the content provider is a compressed files (compressing files is for data transfer is a standard practice in common use).

Art Unit: 2151

16. As for claim 12, Tucci discloses whereby the compressed file is in zip format (using the zip format for file compression is a standard practice in common use).

17. As for claim 13, Tucci discloses whereby the content provider is located remotely ([0102] teaches a system where web store fronts for remote providers are located).

18. As for claim 14, Tucci discloses whereby, the subscriber can view a list of newsletters already subscribed to, on the subscription portal ([0014], lines 1-8 and [0102], lines 1-10, these discuss the list subscription system. Furthermore, [0022], lines 7-13 discuss keeping track of subscriptions).
